

# ELKHORN

## Product Information & Data Sheet

Elkhorn natural stone veneer is a colorful blend of rocky mountain quartzite. The thin stone has deep reddish-brown tones with plums and shades of grey ranging from very light to dark gunmetal. Elkhorn fits loosely into the fieldledge style with some irregular pieces; however, it can also be laid in a more linear ashlar style depending on your design preferences. The quartzite has a high iron content which gives the stone its vibrant rust colors. With the iron content and rust colors, the stone can bleed on exterior applications. This can happen when rain hits the stone and the iron colors or bleeds on a surface below the stone such as a patio. The bleeding effect can easily be prevented by using a sealer on the stone.

### Flats Dimensions

Heights: 2" - 10"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 10"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Copper Tones, Earthy Browns, Gold Tones, Grey Tones  
Style: Fieldledge  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
