

# ELLSWORTH

## Product Information & Data Sheet

Ellsworth natural stone veneer is a beautifully neutral New England granite. The stone has deep rich tones with subtle natural weathering. Having been split with a hydraulic press this thin stone veneer has a rough texture. Ellsworth has predominantly grey tones with some gold and tan. The stone is castle rock style and characterized by the large rectangular pieces of stone. This style is also referred to as square-rectangular or square-rec for short. The individual pieces can range from 4"-12" in height. The castle rock style is most commonly found on large scale exterior projects and is almost always installed with a mortar joint between the pieces of stone.

### Flats Dimensions

Heights: 2" - 12"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Gold Tones, Grey Tones  
Style: Castle Rock  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
