

FELDBERG

Product Information & Data Sheet

Feldberg is a natural hand-picked fieldstone in the ledgestone style. The thin stone is cut exclusively from the edges of the pieces of fieldstone that are collected from farm fields and fence lines. The unaltered fieldstones are sometimes referred to as plates as they loosely resemble a plate in terms of shape. They are typically around a foot in diameter with thicknesses of one to five inches. To create Feldberg, we cut only the edges of the plates to create the roughly linear ledgestone thin veneer. Although it is not easily noticeable once the product is installed, some pieces will have sawn edges due to the nature of the production process.

Flats Dimensions

Heights: 1" - 5"

Lengths: 4" - 12"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"

Lengths: 3"-5" x 6"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Earthy Browns

Style: Ledgestone

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
