

# GENEVA

## Product Information & Data Sheet

Geneva real stone veneer is a natural Wisconsin limestone in a mosaic pattern. The stone has a tumbled finish which softens both the colors and texture. The Geneva raw stone is quite colorful due to natural mineral staining. The tumbling process scuffs the stone and brings out more of the underlying whites and greys from the interior of the limestone. What can start as a brighter red or lavender becomes a more neutral and pleasing plum tone after tumbling. The individual pieces of stone have all-natural edges and are in random shapes.

### Flats Dimensions

Heights: 4" - 12"

Lengths: 4" - 18"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 4" - 12"

Lengths: 3"-5" x 6"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

### Stone Characteristics

Colors: Copper Tones, Gold Tones, Grey Tones

Style: Mosaic

Finish: Tumbled

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
