

GLACIER RIDGE

Product Information & Data Sheet

Glacier Ridge natural stone veneer is a rocky mountain quartzite. The stone appears gray from a distance but has a range of colors upon closer examination. Glacier Ridge showcases color tones from cream to gunmetal. The pieces have a beautiful depth of color with multiple colors within the individual pieces. The stones form a rough ashlar pattern that can be installed with or without a mortar joint. If the dry stack installation (mortarless) method is used, it will require field trimming on-site by the mason. Field trimming is the sawing and cutting of the stone by the mason on-site to square up the pieces and make them more uniform.

Note: This product is currently on backorder. Please contact us before placing an order.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
