

KENNEBEC

Product Information & Data Sheet

Kennebec is an ashlar style blend of both split face (machine cut) and natural bedface thin stone veneer. The split face pieces are the interior parts of the stone with the grey tones; some of the pieces have a pretty and pronounced lavender banding running through them. The bedface pieces are the darker blues with the dimpled pattern. The "bedface" as it is called is the horizontal stone surface of the quarry. If you were to walk across the quarry you would be walking on the natural bed. The natural bed pieces are more colorful due to the mineral staining of the stone. Kennebec thin stone veneer is versatile with medium-sized pieces and soft neutral tones.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Grey Tones, Sky Tones

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
