

TIMBER CREEK

Product Information & Data Sheet

Timber Creek is a castle rock style real thin stone veneer with beautiful earth tones. The stone is cut exclusively into rectangular shapes and shows only the bedfaces of the natural stone. The color variations come from the changes in the mineral composition between the layers in the quarry. The raw stone for Timber Creek is mined from a shelf rock quarry. Shelf rock quarries have naturally layered stone within the quarry so rainwater is able to penetrate between the layers. As the rainwater flowed through the stone over the years, it carried minerals with it which created the beautiful colors in the natural stone veneer.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones, Grey Tones
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
