

# CARAMEL

## Product Information & Data Sheet

Caramel is a natural sandstone thin veneer named for its swirling grains. The unique wood-like grain within the stone is offset by the darker bedface pieces. Blending the two faces of the natural stone adds dimension and character. It also helps the individual pieces pop due to the contrast. The split face stones show the swirling wood-like grains, whereas, the bedface pieces have no grain but show the dark natural mineral staining. The pieces within Caramel are all from the same quarry; they flow well together and look as nature intended. The blend adds beautiful differences in color and texture to create the unique and cohesive Caramel.

### Flats Dimensions

Heights: 2" - 8"  
Lengths: 4" - 18"  
Depths: ¾" - 1½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Earthy Browns  
Style: Ashlar  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
