

# CASTLE RIDGE

## Product Information & Data Sheet

Castle Ridge is a quintessential natural thin cut limestone veneer. The warm and comforting golds, tans, and light yellows showcase classic limestone colors. Castle Ridge is cut from Wisconsin quarried dolomitic limestone which is world-renowned for its durability. The stone is known for its high tensile strength and low water absorption with the stone waste being crushed into DOT-approved gravel. Castle Ridge has been split with a hydraulic press on all four sides to create the rectangular shapes. This chopping or breaking process allows the stone to retain a rustic or natural look compared to a sawed edge. Castle Ridge's large pieces are great for large-scale exteriors and install quickly.

### Flats Dimensions

Heights: 2" - 12"

Lengths: 4" - 18"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Gold Tones

Style: Castle Rock

Finish: Natural

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
