CHALET
Product Information & Data Sheet

Chalet is a tumbled dimensional natural limestone veneer in shades of grey and buff. The thin stones' neutral and stately colors allow them to be used on large scale projects without feeling overly loud or busy. Chalet has a smooth texture and slightly rounded corners as a result of the tumbling process. The limestone has some natural horizontal veining running through the pieces. The veining is not visible from a distance but reveals its character upon closer inspection. Chalet's standard sizes are a blend of 2.25", 5", and 7.75" in random lengths. Larger custom heights of 10.5" and 13.25" are available upon request with an additional fee.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

We have resources to help with everything from mortar joint selection to a full PDF install guide.

Flats Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 4" – 16"
Depths: ¾" – 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 3"–5" x 8"–12"
Depths: ¾" – 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Dimensional
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
