

CHERRYWOOD

Product Information & Data Sheet

Cherrywood is a dimensional cut or sawed height natural stone veneer. This natural thin veneer is known for its unique and vibrant colors. From a distance, the finished wall will have a deep red or lavender tone, but upon closer inspection, the whites and greens shine through. This type of color variation can only be achieved with natural stone; it comes from the mineral concentration within the ground where Cherrywood is quarried. Cherrywood has a tumbled finish giving it an old and weathered feel that is soft to the touch.

Flats Dimensions

Heights: 2- $\frac{1}{4}$ ", 5", 7- $\frac{3}{4}$ "

Lengths: 4" - 16"

Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2- $\frac{1}{4}$ ", 5", 7- $\frac{3}{4}$ "

Lengths: 3"-5" x 8"-12"

Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "

Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones,
Natural Tones

Style: Dimensional

Finish: Tumbled

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
