

CHESTNUT

Product Information & Data Sheet

Chestnut is a classic castle rock style real stone veneer in earthy brown tones. The thin stone has an unusually rough texture compared to our other castle rock options. Chestnut is predominantly shades of brown but also has some lighter tan and rust tones. The slabs of Chestnut high-density sandstone are split or "chunked" into rectangles of various sizes that will be used to create the natural thin veneer. The blocky pieces of stone are fed into the saw to create the approximately 1" thick thinstone. Chestnut showcases the natural bedface of the stone which typically has the richest color palette due to the variations in minerals over millennia.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
