

CHILTON

Product Information & Data Sheet

Chilton is a colorful castle rock style natural thin stone veneer. The thin stone veneer has been split with a hydraulic press on all four sides to create the rectangular stone pieces. Chilton's texture is relatively smooth with occasional ripples. This texture variation is affectionately called gator skin in the stone industry. Chilton's eye-popping full range of color truly sets it apart from our other real stone veneer options. Typically, multiple types of stone would be blended together to achieve this full range of color. Chilton stones come from a single quarry; the color of the stone in the quarry changes with each and every layer due to the differences in mineral staining.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones, Gold Tones, Grey Tones, Sky Tones
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
