

COLONIAL

Product Information & Data Sheet

Colonial is a natural sandstone veneer in the fieldledge style. Fieldledge real stone veneer is best described as a blend of ashlar and mosaic style pieces, although, Colonial will also have some larger rectangular castle rock type pieces. The application photos of Colonial are diverse and truly show how the masonry contractor, homeowner, or designer can impact the finished look. The individual pieces of stone can be installed more linearly with the mosaic pieces used as "jumpers" where they jump up to the next course of stone. They can also be installed in a more mosaic style without the defined linear courses of stone. It is important to keep in mind that the mason will always do some field trimming to adjust the stone on site.

Flats Dimensions

Heights: 2" - 10"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 10"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones
Style: Fieldledge
Finish: Natural

Packaging

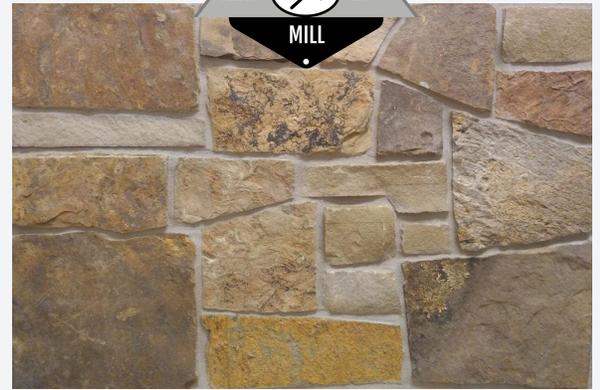

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
