

CHAMBERLAIN

Product Information & Data Sheet

Chamberlain is a dimensional cut marble natural stone veneer. The stone is cut to heights of 2.25", 5", and 7.75" which creates clean and formal lines. Dimensional cut stone is also referred to as sawed height stone within the industry. Chamberlain has a deep depth of color with a tempered or washed-out looking surface over the darker blue and grey tones. The lighter whites and greys permeate the stone with occasional earthy browns from the minerals present within the ground. The texture of Chamberlain is rough due to how the stone naturally splits apart.
