

# MOONLIGHT

## Product Information & Data Sheet

Moonlight is arguably our most unique natural stone veneer. The stone has an exotic look and feel to it and literally sparkles. The natural quartzite has a heavy grain which causes the pieces to split into more of an angled edge as opposed to the roughly squared edges of our other dimensional stones. Moonlight thin stone veneer has a nice course and rippled texture. The color the stone appears is highly dependent on the light around it as shades of black and white show through. The clean dimensional style offsets the eye-catching color and sparkles of the stone.
