COLUMBIA
Product Information & Data Sheet

Columbia is a classic ashlar style natural thin stone veneer in shades of grey and soft black. The stone is tumbled creating a beautiful and unusually soft texture for natural stone veneer. Columbia is a versatile stone choice that compliments many other types of siding. The stone is a blend of the two faces of the natural sheets of stone as they come out of the quarry. The lighter grey tones are cut from the interior part of the sheets, while the darker pieces are the outer faces of the sheets that have been exposed to erosion and the elements for years. The darker colors come from the heavy mineral concentration within the ground.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

We have resources to help with everything from mortar joint selection to a full PDF install guide.

Flats Dimensions

Heights: 2″ – 8″
Lengths: 4″ – 18″
Depths: ¾″ – 1½″
Weight: 13 – 15 lb. per square foot

Corner Dimensions

Heights: 2″ – 8″
Lengths: 3″–5″ x 8″–12″
Depths: ¾″ – 1-½″
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones
Style: Ashlar
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
