

SUNSET

Product Information & Data Sheet

Sunset is a dimensional style quartzitic sandstone natural thin veneer. This thin stone product is adored for its beautiful veining and warm rich colors. Sunset contains golds, creams, pinks, browns, and the occasional off-white. The veneer shows the split face or interior part of the stone. Split face is also referred to as machine-cut in the stone industry. Sunset is unique due to its wide color range which is not common on the interior of the stone. With the exception of some granites, the interiors of the natural stone slabs are typically more monochromatic. Sunset offers a beautiful color range in the dimensional split face style.
