

CORTEZ

Product Information & Data Sheet

Cortez real stone veneer is a house-made blend of natural quarried sandstones. The blend showcases both the natural mineral stained bedface as well as the more monochromatic interior part of the stone known as the split face. The individual pieces of real stone veneer will range in texture from rippled to sandy and smooth. With its range of natural earth tones, Cortez is versatile and complements a variety of other siding options such as brick, log, and stucco. Cortez can be installed with or without a mortar joint. A half-inch mortar joint is most common, but drystacking the stone gives a rustic yet modern feel.
