

DOOR COUNTY FIELDSTONE

Product Information & Data Sheet

Door County Fieldstone is a natural weathered limestone thin veneer. Every piece of Door County Fieldstone has natural weathering and stratification which gives the stones horizontal ripples. The texture is exclusive to weathered limestone and is caused by the layering of the stone and exposure to the elements. Some of the pieces can appear earth tone; these are the stones that come into contact with the topsoil and have been stained by the minerals within the soil over the years. The rustic limestone has been used throughout Door County for decades and is what gives the area its historic charm and feel.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones,
Natural Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
