

FIELDSTONE COBBLES

Product Information & Data Sheet

Fieldstone Cobbles are a colorful natural granite thin stone veneer. The raw stone boulders or mini boulders as they are sometimes called are not quarried but instead collected from glacial deposits. The stone was deposited or dropped by the glacier as it moved south centuries ago. The pieces of stone have a smooth tumbled feel; they are not tumbled by our machines but instead naturally tumbled by the glacier. As the glacier slowly moved, the stones turned and rubbed against each other. This process changed the once jagged and irregular pieces of stone into the smooth round pieces we see today. This granite is one of the hardest stones we cut in terms of compressive strength.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 6"-10"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones, Gold Tones, Grey Tones, Natural Tones
Style: Cobblestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
