

HAMILTON

Product Information & Data Sheet

Hamilton is a clean and consistent tumbled natural limestone veneer. The thin stone is the standard dimensional cut with sawed heights of 2.25", 5", and 7.75". Hamilton has a natural mix of buff tones with shades of grey ranging from very light grey to hints of gunmetal. The limestone used to create Hamilton is unearthed in large blocks. The blocks are sawed into sheets with a diamond rope saw loosely resembling a very large band saw turned horizontally. The sheets are split into 4" blocks of building stone and fed into the tumbler before being sawed into thin veneer. The combination of the formal dimensional cut style and old-world tumbled finish create an unusual and beautiful option for real stone veneer.

Flats Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Dimensional
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
