

LA SPEZIA

Product Information & Data Sheet

La Spezia is a dimensional or sawn height natural thin stone veneer that has a tumbled finish. The stone is adored for its cream and buff tones. The light and consistent color tones complement the soft textures achieved by tumbling the natural limestone. To create La Spezia, large blocks of stone are quarried and then sawn into sheets with heights of 2.25", 5" and 7.75". The uniform sheets are fed into a large hydraulic press and snapped in 4" increments which creates the full depth building stone. The building stone is processed in a tumbler to round the edges and create a softer looking stone. Lastly, the 4" thick stone is sawn into the natural thin veneer.

Flats Dimensions

Heights: 2- $\frac{1}{4}$ ", 5", 7- $\frac{3}{4}$ "
Lengths: 4" - 16"
Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2- $\frac{1}{4}$ ", 5", 7- $\frac{3}{4}$ "
Lengths: 3"-5" x 8"-12"
Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Natural Tones
Style: Dimensional
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
