

LUEDERS

Product Information & Data Sheet

Lueders is a classic stone that has been used as a construction material for centuries. Although the process of sawing the stone into the thin veneer is relatively new, the stone retains the original iconic look. Sawing Lueders into the thin stone has no effect on its durability as a top-quality building material and allows for easier installation. The stone colors are neutral and cover walls well without being too "loud". The colors range from buff and white to golds and very soft brown. The individual pieces of Lueders have a sawn top and bottom and are sometimes referred to as sawn height.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

Flats Dimensions

Heights: 2-1/4", 5", 7-3/4"
Lengths: 4" - 16"
Depths: 3/4" - 1-1/2"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2-1/4", 5", 7-3/4"
Lengths: 3"-5" x 8"-12"
Depths: 3/4" - 1-1/2"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Natural Tones
Style: Dimensional
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
