MAHOGANY

Product Information & Data Sheet

Mahogany is a low height dimensional ledgestone natural thin stone veneer. It showcases beautiful darker earth tones while still maintaining a neutral appearance. The dimensional ledgestone style is sawn to smaller heights than our standard dimensional style. Mahogany can be installed with or without a mortar joint. If drystacking (mortarless joint) is desired, the pieces will have to be laid in a running bond or course height style. In this style, each row of stones is the same height. The drystack method works best for interior applications and creates an exquisite focal point. However, drystacking can become busy on large scale applications. Mortar joints are recommended for larger projects.

Flats Dimensions

Heights: 1″ - 6″
Lengths: 4″ - 12″
Depths: ¾″ - 1-½″
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1″ - 6″
Lengths: 3″-5″ x 8″-12″
Depths: ¾″ - 1-½″
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Dimensional Ledgestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
