

MANITOWISH

Product Information & Data Sheet

Manitowish is a beautiful earthy brown cobblestone natural thin veneer. The thin veneer is cut from small round pieces of natural stone that are hand collected as opposed to quarried. Manitowish and cobblestones in general are also called river rocks. The stones are most commonly used on mountain or lakeside cabins and are the perfect complement to log siding or cedar shake. Manitowish has beautiful color variation that remains subtle on large scale walls. The stones are neutral consisting mostly of brown and tan tones.

Flats Dimensions

Heights: 4" - 12"

Lengths: 4" - 16"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 6"-10"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones

Style: Cobblestone

Finish: Natural

Packaging

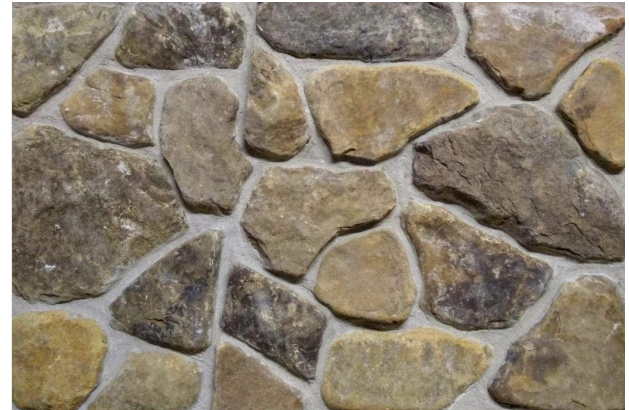

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
