

# MIROMAR

## Product Information & Data Sheet

Miromar is a blend of split face style natural thin stone veneers from two of our quarries. One quarry produces the soft brown and tan tone pieces, whereas, the other quarry produces the pieces with shades of grey. The difference in the color variation within the same stone formation is spectacular as the quarries are only 50 miles apart. Miromar is a 100% split face or machine-cut product; it showcases only the interior part of the natural stone. This stone is naturally a low height ledgerstone. Each piece has a natural top and bottom as Miromar is cut from natural sheets of stone with thicknesses of 2"-5".

### Flats Dimensions

Heights: 1" - 5"

Lengths: 4" - 12"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 1" - 5"

Lengths: 3"-5" x 6"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

### Stone Characteristics

Colors: Gold Tones, Grey Tones

Style: Ledgerstone

Finish: Natural

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
