

MONTANA

Product Information & Data Sheet

Montana is an aptly named natural thin stone veneer as it was our first venture into the beautiful Rocky Mountain stone formations in Big Sky Country. The thin stone is sought after for its darker tones and range of colors. Montana is a natural quartzite that is both extremely strong and dense. The stone falls loosely into the ashlar style but is not as uniform as some of our other offerings. This variation gives Montana more of a rugged and rustic feel; the stone pieces look as if they came from an old mining camp. Montana is a perfect fit for a mountain lodge or lakeside cabin.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones,
Earthy Browns, Grey Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
