

NORTHWOODS

Product Information & Data Sheet

Northwoods is a mosaic style natural stone veneer with pleasing earth tones. The thin stone is cut from natural quarried sandstone that is architecturally approved for applications in all climates due to its high compressive strength and low water absorption. Sandstone can have the connotation of being a softer or less durable stone. Although Northwoods is a natural sandstone, it is exceptionally durable. We do not quarry or cut any stone that does not pass ASTM requirements. Northwoods embodies the centuries-old rustic charm with its mosaic style and neutral tones. The mosaic style of Northwoods showcases the unaltered pieces of stone; mosaic was the only stone style centuries ago before modern saws and hydraulic presses.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 4" - 12"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Mosaic
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
