

PALMETTO

Product Information & Data Sheet

Palmetto is a colorful tumbled castle rock style natural thin stone veneer. This thin stone consists of large rectangular individual pieces of stone that install relatively quickly and are great for large exterior walls. Although the raw stone is quite colorful, the tumbling process softens the tones. The tumbling process also removes any sharp edges on the stones leaving a fairly smooth texture. Palmetto is unique in that it showcases a natural blend of colors all pulled from the same quarry. The colors of the stone change as you move into deeper layers of the quarry. In this case, the brown tones are quarried from the top layers and the blues and greys appear as deeper layers are excavated.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones
Style: Castle Rock
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
