

PROMENADE

Product Information & Data Sheet

Promenade natural stone veneer represents an old-world colonial look with a soft, tumbled finish. The stone starts as natural quarried limestone where the sheets or slabs of stone are split into smaller usable blocks. The blocks are fed into a large drum which slowly spins allowing the pieces to fall on and bash into one another. This is a very loud process that requires a significant buffer zone for noise when it is in operation. The previously sharp-edged pieces emerge with soft rounded corners and a smooth scuffed texture. Tumbling the natural limestone in this fashion gives it a distressed look which adds to its beauty. The tumbled pieces are fed into the saw to create the thin veneer and final

Promenade
product.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Ashlar
Finish: Tumbled

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
