

RAINIER

Product Information & Data Sheet

Rainier is a natural fieldstone thin veneer with rustic earth tones. Rainier starts as loose pieces of stone that are found in the topsoil. As new land is opened the topsoil is cleared with a bulldozer to expose the bedrock. In the quarrying world this is known as removing the overburden. The loose pieces of stone within the overburden are screened and collected to be cut into thin veneer. Rainier has a great depth of color and character due to the exposure to the elements that the pieces received. The stone can be installed in a more linear or irregular pattern depending on your design preference.

Flats Dimensions

Heights: 2" - 10"

Lengths: 4" - 18"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 10"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Copper Tones,

Earthy Browns

Style: Fieldledge

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
