

SEQUOIA

Product Information & Data Sheet

Sequoia is a beautiful natural dimensional ledgestone veneer. The stone is sawed on the top and bottom at specified heights to create the dimensional ledgestone. It is unique in that it is one of only a few sawed face products we have. In addition to the sawed heights, Sequoia is sawed on the front and back leaving the faces of the stone perfectly flat and smooth. Sequoia is sought after for its wood grain-like appearance. Sealing natural stone veneer is a matter of personal preference. Medium to high shine sealers are not typical for most natural stone veneer products as they take away from the natural look of the stone, however, at least a medium gloss sealant is highly recommended on Sequoia as it accentuates the grains of the stone.

Flats Dimensions

Heights: 1" - 6"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 6"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones
Style: Dimensional Ledgestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
