

SHENANDOAH

Product Information & Data Sheet

Shenandoah is a classic and colorful ashlar style real stone veneer. The thin veneer is cut from high-density sandstone and approved for all applications in even the harshest climates. The stone gets its color from being a 100% bedface material. The bedface is the outer part (top and bottom) of the sheets of stone as they are quarried. The outer parts of the stone had rainwater wash in minerals over millennia giving the natural sandstone color. Shenandoah is an ashlar style stone of medium-sized rectangular pieces. Each piece of stone has been cut with a hydraulic press on all four sides.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Gold Tones, Grey Tones, Sky Tones
Style: Ashlar
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
