

SIERRA

Product Information & Data Sheet

Sierra natural stone veneer is an earthy blend of granites with a weathered and rugged feel. The stones range from approximately 1"-5" in height and are laid in a linear pattern. The individual pieces of stone provide a rustic yet contemporary look. The pieces have a unique speckled appearance and naturally rough texture. Sierra showcases the interior part of the stone and has been split with a hydraulic press. The colors vary from greys and golds to the occasional brown. Sierra can be installed with the standard half inch mortar joint (shown) or the pieces can be drystacked (tight fit installation). With a drystack installation you can expect both the mason's cost and waste factor (due to fitting the stones together) to increase substantially.

Flats Dimensions

Heights: 1" - 5"

Lengths: 4" - 12"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"

Lengths: 3"-5" x 6"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey

Tones, Natural Tones

Style: Ledgerstone

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
