

SNOWCAP

Product Information & Data Sheet

Snowcap is a top of the line white dimensional natural stone veneer. This stone is uniquely true white because it is quarried at a deep depth where mineral staining has not occurred, whereas, most stones advertised as white are more of a cream tone due to the mineral content. Snowcap is quarried in large blocks the size of a car and then sawed into sheets to be processed into thin veneer. What sets Snowcap apart is its true white color and rockfaced finish. Rockfacing involves hand chipping the edges of every single piece of stone to create texture and make the pieces slightly bow in the middle. This labor-intensive process is also called pitching or dressing within the stone industry.

Flats Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Natural Tones
Style: Dimensional
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
