

SAFFRON HILLS

Product Information & Data Sheet

Saffron Hills is a dimensional or sawn height style natural sandstone thin veneer. This colorful blend of natural stone consists of brown, gold, grey, and tan tones. Saffron Hills showcases both the consistent tones of the interior part of the stone and the bright colors of the natural bedface. The thin stone is cut from sandstone that is architecturally approved for all applications due to its high compressive strength and low water absorption. Sandstone can have the connotation of being a softer or less durable stone. Although Saffron Hills is a natural sandstone, it is exceptionally durable. We do not quarry or cut any stone that does not pass ASTM requirements.

Flats Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2-¼", 5", 7-¾"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Gold Tones, Grey
Tones, Natural Tones
Style: Dimensional
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
