

ABINGDON

Product Information & Data Sheet

Abingdon is a tumbled ashlar-style limestone natural thin veneer. The colors consist of off-whites, greys, and golds. The stones have a sawn edge with a tumbled finish that embodies old European-style design.

Abingdon is broad in terms of applications due to the medium-sized ashlar pieces. This natural stone veneer is well suited for both large and small-scale walls. Abingdon is sold as loose pieces of stone ranging from 2"-8" inches in height. The stone is shown with a standard half-inch grey raked mortar joint between the pieces. This is the most common installation method, however, other joint options and mortar colors can be used. Tumbled stones like Abingdon commonly use flush and overgrout mortar techniques for an old-world appearance.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones
Style: Ashlar
Finish: Tumbled

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
