

ABINGDON

Product Information & Data Sheet

Abingdon is an ashlar style stone that can be used to recreate an old European style design. It is broad in terms of applications due to the medium sized pieces. This natural stone veneer is well suited for both large and small scale walls. Abingdon is sold as loose pieces of stone ranging from 2"-8" inches in height. The stones have a sawn edge with a tumbled finish. The colors consist of off whites, greys and golds. The stone is shown with a standard half-inch grey raked mortar joint between the individual pieces. This is the most common installation method, however, other joint options and mortar colors can be used. Tumbled stone lends itself to flush and overgrout mortar techniques for an old world appearance.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey

Tones, Natural Tones

Style: Ashlar

Finish: Tumbled

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
