

CAMBERLY

Product Information & Data Sheet

Camberly is a natural quartzite veneer in the ledgestone style. The stone showcases the seamface or natural edges that were exposed to cracks in the ground. The seamface gives Camberly a wide variety of textures with pieces ranging from smooth to rippled. Camberly has a unique depth of color, showcasing a base of shades of grey with various degrees of gold mineral staining.

The individual pieces of stone are unaltered except for being sawn on the back with a diamond blade to create the thin stone. The stones come in a unique range of heights, with the smaller height stones coming from the thinner layers of the quarry.

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones
Style: Ledgestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
