

KALAHARI

Product Information & Data Sheet

Kalahari is a natural thin-cut sandstone veneer in the random ashlar pattern. The sandstone showcases a neutral color palette with natural mineral staining from centuries of rainwater carrying mineral deposits. The mineral staining gives the stone a subtle depth of color and movement within the stone that is noticed upon closer inspection.

Kalahari is our most cost-effective ashlar-style natural stone veneer as well as one of our overall best values. The natural stone has the same premium quality as our other natural stone veneer options, not only in the cut but also in the durability of the sandstone itself. With its neutral color palette and affordable price point, Kalahari is a perfect fit for large-scale residential or commercial projects.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Earthy Browns, Gold Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
