

KALAHARI

Product Information & Data Sheet

Kalahari is a natural thin limestone veneer cut into a castle rock style. This stone is considered to be a castle rock style due to its large rectangular pieces, however, it is uniquely cut to have a more rustic feel than our other castle rock style options. The pieces are slightly irregular in shape which allows the mason flexibility when installing the product. Kalahari lends itself to installation with a flush or slight overgrout mortar joint technique; these types of mortar joints give the project an old-world feel. This real stone veneer effortlessly compliments terracotta roof tiles. Kalahari is a natural choice for Mediterranean inspired architecture.

Flats Dimensions

Heights: 2" - 12"

Lengths: 4" - 18"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Gold Tones, Natural Tones

Style: Castle Rock

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
