

LANGSTON

Product Information & Data Sheet

Langston thin stone veneer is cut from natural hand-picked fieldstone. This stone has an absolutely beautiful color range. Although predominantly earthy brown, there are blacks, lavenders, tans, and even whites. This real thin stone veneer showcases the natural faces of the fieldstone that have been weathered for years by the elements with textures ranging from coarse to smooth. Langston is technically a cobblestone, however, the pieces are slightly more linear than some of our other cobblestones. This allows the mason to install the stone in a rough linear pattern if desired. This natural stone veneer brings a rustic, warm, and inviting look and can be used on projects both large and small.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Cobblestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
