

# LENEXA

## Product Information & Data Sheet

Lenexa is a classic dimensional style stone with unique and consistent dark tones. This natural limestone has a split face and showcases the interior part of the stone. Lenexa has some subtle natural veining within the individual pieces. This natural stone veneer is well suited for both large and small scale projects. Lenexa is shown here with heights of 2.25", 5" and 7.75", however, we can add larger heights depending on the overall scale of the project. With being a dimensional stone, it is cut specifically for a half inch mortar joint and shown here with standard grey mortar. Lenexa can be cut into custom sizes if drystacking is desired but that will increase both the price and lead time.
