

# MANCHESTER

## Product Information & Data Sheet

Manchester is a gorgeous natural limestone panel for modern and contemporary design. The standard panels are 1" thick, sawn on all six sides, and 12" x 24". The sawn face is smooth but you can still feel the grain of the stone when running your fingers across the pieces. The grains within Manchester twist and swirl randomly contrasting against the clean-cut pieces of stone. The standard panels are 12" x 24" with a sawed finish; however, custom sizes, custom finishes, and corners are available by special order. This type of product is referred to as stone cladding on the west coast. Manchester is a popular choice for commercial applications due to its rapid and cost-effective installation.

### Flats Dimensions

Heights: 2-¼", 5", 7-¾"

Lengths: 4" - 16"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

### Stone Characteristics

Colors: Gold Tones, Natural Tones

Style: Dimensional

Finish: Natural

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
