

PEWTER NIGHT

Product Information & Data Sheet

Pewter Night real thin stone veneer is a natural limestone sawn into a dimensional style. The stone has a greater depth of color than what is typically common for a limestone and can give a very soft sparkle in the sunlight. The colors consist of buff, light and dark gray, and hints of gold. The tumbled finish softens the texture and colors of the stone. The stone is sawn to three heights: 2.25", 5" and 7.75". It is intended to be installed with a half inch mortar joint between the pieces.
