

# SALINA

## Product Information & Data Sheet

Salina natural thin veneer consists of smaller pieces of irregular stone with a tumbled finish. Smaller piece stones like Salina are sometimes referred to as rubble within the stone industry. Salina is a natural limestone with shades of gold and buff. The thin stone is shown here with a standard half in grey raked mortar joint, however, this would be a fitting stone for a flush technique. The flush technique provides a true old world feel and takes you back to a time when stone was used structurally. Salina is the stone of choice if you are looking to create a Mediterranean inspired villa.

### Flats Dimensions

Heights: 4" - 12"

Lengths: 4" - 18"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 4" - 12"

Lengths: 3"-5" x 6"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

### Stone Characteristics

Colors: Gold Tones

Style: Mosaic

Finish: Tumbled

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
