SILVER CLOUD

Product Information & Data Sheet

Silver Cloud is an elegant dimensional stone with semi-consistent color tones including light blue/grey, buff and soft charcoal. The thin stone veneer showcases the interior part of the natural quarried limestone that has been split with a hydraulic press. One of the neat and unique things about Silver Cloud is there are some visible fossils within the stone. This natural stone veneer is dimensional cut into heights of 2.25", 5" and 7.75". Larger heights are available upon request. The stone is shown with a standard half-inch grey raked mortar joint between the individual pieces.
