

TAHOE

Product Information & Data Sheet

Tahoe is a timeless and classic fieldstone veneer in the natural mosaic style. The stone is cut from hand-picked fieldstone that has naturally weathered for centuries. With the exception of the sawed back to create the thin stone, Tahoe is completely unaltered fieldstone. The pieces have not been split or sawn to create a desired shape and instead retain their natural edges and irregular shapes. Tahoe has an abundance of weathering and subtle color variation due to the exposure of the stone to the elements over the years. Although still within the weight tolerance for natural stone veneer, Tahoe is a product we cut slightly thicker to ensure beautiful large pieces.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Earthy Browns
Style: Mosaic
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
