

BALTIC HILLS

Product Information & Data Sheet

Baltic Hills is a natural Wisconsin quarried castle rock style limestone veneer. The stone has cooler tones with hints of gold. Baltic Hills comes out of the ground in unusually large sheets (due to its hardness) which are then split into rectangles with a hydraulic press under 300 tons of pressure. The rectangular blocks of stone are sawed into thin veneer.

Baltic Hills is dolomitic limestone quarried from the Niagara Escarpment. An escarpment is a steep slope or long cliff that forms as a result of faulting or erosion. The Niagara Escarpment runs east/west from Wisconsin through the upper peninsula of Michigan and Ontario ending in New York with Niagara Falls.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones, Sky Tones
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
